DETAILED ACTION

Status of Application, Amendments, and/or Claims

1. The Preliminary Amendment filed 26 February 2002 has been received but has not been entered. The Amendment refers to an "Article 34 amendment of October 26, 2002". No such amendment was received by the USPTO. The instant Office Action is based on the claims as filed on 16 July 2002.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.
3. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-5, drawn to *transplantation material*.

Group 2, claim(s) 6-10, drawn to a kit comprising an *antibody* against the Gala1-3Galb1-R epitope and a complement reagent.

Group 3, claim(s) 11-13, drawn to a *method for removal* of macrophages and/or microglial cells.

Group 4, claim(s) 14, drawn to a *method for treatment* of neurological disorders.

Art Unit: 1647

5. According to PCT Rule 13.2, unity of invention exists only when there is a shared same or corresponding special technical feature among the claimed inventions. All the groupings pertain to porcine embryonic or fetal neural tissue treated with antibodies against the Gal α 1-3Gal β 1-R epitope but each group has a different special technical feature not shared by the remaining groups.

Group 1 is directed to the special technical feature of *transplantation material* not shared by any of the remaining groups.

Group 2 is directed to the special technical feature of an *antibody* not shared by any of the remaining groups.

Group 3 is directed to the special technical feature of a *removing macrophages and/or microglial cells* not shared by any of the remaining groups.

Group 4 is directed to the special technical feature of a *therapy method* not shared by any of the remaining groups.

6. The Examiner has required restriction between product and method claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn method claims that depend from or otherwise include all the limitations of the allowable product claim

Art Unit: 1647

will be rejoined in accordance with the provisions of MPEP § 821.04. **Method claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier.

Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

7. In the event of rejoinder, the requirement for restriction between the product claims and the rejoined method claims will be withdrawn, and the rejoined method claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and method claims may be maintained. Withdrawn method claims that are not commensurate in scope with an allowed product claim will not be rejoined.

See “Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b),” 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the method claims should be amended during prosecution either to maintain dependency on the method claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

8. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the Examiner before the patent issues. See MPEP § 804.01.

Art Unit: 1647

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
10. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and/or different classification, restriction for examination purposes as indicated is proper.
11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Summary

12. No claims are allowed.
